Will your watch keep ship's chronometer time.

South Bend Watches, carried upon long sea voyages and protected only by an ordinary watch case, exposed to every variation of position, temperature and the incessant vibration and roll of the ship, keep perfect time, second for second, with the carefully guarded and accurate chronometer which every sea going vessel is compelled to carry.

They are used also against railway travel by check riding, automobilism, or any of the many lofts and jabs and bangs of everyday use. We will be pleased to show you our line of these watches at any time.
